

Ilan Kinreich
COO

As COO, Mr. Kinreich is charged with setting the direction for Radware's products overseeing all R&D, QA, product management activities and technical services across the company. He is responsible for developing innovative, quality products that meet market requirements while making sure new capabilities and products are timely released to increase competitive positioning.

Mr. Kinreich has a vast knowledge for creating innovative products to match market requirements, developing R&D processes and executing R&D automation and methodologies, an experience which was accumulated in over 25 years in the high-tech industry. Prior to Radware he was the founder and CEO of Radview Software that developed performance testing and management solutions. Mr. Kinreich took the company from inception to a Nasdaq IPO accumulating hundreds of enterprise customers from the financial services, high-technology, telecommunications and retail sectors. Before Radview, he was a co-founder and VP R&D for Mercury Interactive, a company that has defined the software quality assurance market and eventually was acquired by HP for \$4.5B. Prior to that he was R&D manager at Daisy Systems a manufacturer of CAD solutions for electrical engineers.

Mr. Kinreich holds a bachelor's of science degree in Mathematics and Computer Sciences from Bar-Ilan University, Israel.
