

Roy Zisapel
President & CEO

Radware co-founder Mr. Zisapel has served as President, Chief Executive Officer and Director since the company's inception in April 1997. An innovator in the networking technology industry, Mr. Zisapel provides focused vision and direction to Radware as it leads the market in integrated application delivery solutions for business-smart networking.

Before founding Radware, Mr. Zisapel directed research and development projects for RND Networks Ltd., pioneering the company's award-winning IP load balancing product line. Prior to this, Mr. Zisapel led algorithmic research for Madge Networks' LAN ATM switch. Subsequent to Lucent's 1998 acquisition of Madge Networks, the device was renamed the Cajun M770 multi-layer switch, becoming a key element of Avaya's networking suite. Mr. Zisapel began his career as a software engineer at Algotech Systems, a medical imaging solutions company.

Mr. Zisapel graduated summa cum laude with a B.S. degree in mathematics and computer science from Tel Aviv University, where he was honored with the International Wolf Prize for research students. Additionally, Mr. Zisapel holds several U.S. patents and patent applications in the areas of global load balancing, network proximity, traffic redirection and multi-homing.
