

Overview

Radware (NASDAQ:RDWR), the global leader in integrated application delivery solutions, assures the full availability, maximum performance, and complete security of business-critical applications for more than 6,000 enterprises and carriers worldwide. With APSolute™, Radware's comprehensive and award-winning suite of products, companies in every industry can drive business productivity, improve profitability, and reduce IT operating and infrastructure costs by making their networks "business-smart". For more information, please visit www.radware.com

Company Highlights

- Founded in April, 1997
- Initial Public Offering, September, 1999
- International headquarters in Tel Aviv, Israel; US Corporate headquarters in Mahwah, New Jersey; additional offices in the United States, Canada, Latin America, EMEA, India, and Asia-Pacific
- Acquisitions: V-Secure, 2005; Covelight, 2007
- 600 employees
- Fiscal year 2007 revenue in excess of \$88 million
- 6,000 + customers worldwide

Radware's Business-Smart Data Center Strategy

Radware's Business-Smart Data center initiative was designed to ensure the alignment of key business drivers for the next generation data center. At the core of this strategy is Radware's ability to provide its customers with tailor-made application infrastructure solutions for the next generation data center to help them overcome IT complexities and ensure cost effective procurement and full investment protection.

Radware's approach is unique in that it offers a range of innovative capabilities essential to facilitating key business drivers while being fully integrated into existing infrastructure and rendering customer networks business-smart. These capabilities are inclusive of pay-as-you-grow procurement models, state of the art on demand platforms, real-time behavioral security and the alignment of network behavior based on business events.

Radware Business-Smart Networking

Radware's next generation APSolute™ product family is a unified application delivery solution designed to ensure reliable, fast and secure networked and web-enabled applications. APSolute brings together the application intelligence and processing power needed to make networks "business-smart" so they can adapt and be responsive to dynamic IT and business needs.

With Radware APSolute, enterprises and carriers can deliver mission critical applications everywhere - over the Internet and all the way across the WAN - optimizing end-to-end network operations for high scalability, consolidation and operational cost savings.

APSolute™ Product Suite

Application Performance Monitoring (APM)™ - extends the capabilities of application delivery and security solutions providing real-time detailed visibility into application performance and accurately pinpointing the source of performance degradation.

AppDirector™ - Intelligent application delivery controller for data center optimization with advanced Layer 4-7 policies and granular packet classification to eliminate traffic surges, server bottlenecks, connectivity disconnects and downtime for ensured business continuity.

AppXcel™ - Application delivery accelerator for distributed users connecting from anywhere over wire or wireless networks. Features web compression, TCP optimization, caching, SSL offloading, and HTTP multiplexing.

AppXML™ - Provides secure, high-performance XML and web services communications for mission-critical applications between an enterprise and its business partners.

Content Inspection Director® (CID) - managed service delivery platform for carriers that enables centralized and optimized IP value-added service deployment. Provides high-performance security, media services and customizing delivery which guarantee SLAs and generate new sources of revenues.

**APSolute™
Product Suite
(continued)**

DefensePro® – High-speed intrusion prevention at the network core or branch with multi-layered Denial of Service (DoS) protection including rate, signature, and behavior-based. Leverages proprietary String Match Engine® for bi-directional scanning.

Inflight™ – an online, network-based pervasive monitoring solution that delivers actionable, real-time business-level events to any back-end analytic system to optimize business processes and ensure compliance.

Insite ManagePro™ – Appliance-based management and monitoring system for IT staff to centrally manage distributed devices and check the health, real-time status, performance and security of enterprise-wide application delivery infrastructures.

LinkProof® – Reliable, fast connectivity with enterprise multi-homing and WAN optimization functionality to provide global access to critical applications hosted in the data center.

LinkProof® Branch – Remote office access solution for accelerated and cost effective “server-less” application delivery from HQ to branch offices.

SecureFlow™ – Unified security switch for optimized, scalable management of best-of-breed firewalls, VPN gateways, IDS, anti-virus and content filtering security tools.

SIP Director™ – comprehensive SIP-aware application delivery controller (ADC) for application vendors, Telecom Equipment Manufacturers (TEMs) and System Integrators (SIs).

VirtualDirector™ - optimization solution for the virtualized data center – providing adaptive and dynamic allocation of resources based on business events, guaranteeing SLA and improving response time of applications.

**APSolute Application Delivery
Architecture**

**APSolute OS
Application Switches
APSolute Insite**

Radware’s APSolute solution for integrated application delivery draws its power from the company’s innovative OnDemand Switch™ software-upgradeable hardware architecture, which delivers breakthrough performance and scalability. APSolute products leverage the full set of APSolute OS health monitoring, traffic redirection, bandwidth management, intrusion prevention and denial of service features. APSolute Insite is a unified performance management tool that gives unprecedented site-wide visibility and centralized control of all application switching devices across the entire network including server farms, routers and firewalls.

Distribution Partners

Radware solutions are sold and supported through field sales operations, as well as by a worldwide network of authorized VARs, distributors, and system integrators.

Technology Partners

AT&T, BEA, Finjan, Forum, HP, IBM, Imperva, InfoSys, Microsoft, Oracle, Riverbed, SAP and VMware are leading Radware partners.

**Executive
Management**

Christopher R. McCleary	Executive Chairman of the Board
Roy Zisapel	Chief Executive Officer and President
Meir Moshe	Chief Financial Officer
Ilan Kinreich	Chief Operations Officer
Amir Peles	Chief Technology Officer
David Aviv	Vice President, Advanced Services
Yaron Bielous	Vice President, Product Management
Avi Chesla	Vice President, Security Products
Ran Ilany	Vice President, DPI/DFI Products
