

Investor Presentation

July 2021

SAFE HARBOR

This presentation includes “forward-looking statements” within the meaning of the Private Securities Litigation Reform Act of 1995. Any statements made herein that are not statements of historical fact, including statements about Radware’s plans, outlook, beliefs or opinions, are forward-looking statements. Generally, forward-looking statements may be identified by words such as “believes,” “expects,” “anticipates,” “intends,” “estimates,” “plans,” and similar expressions or future or conditional verbs such as “will,” “should,” “would,” “may” and “could.” Because such statements deal with future events, they are subject to various risks and uncertainties, and actual results, expressed or implied by such forward-looking statements, could differ materially from Radware’s current forecasts and estimates. Factors that could cause or contribute to such differences include, but are not limited to: the impact of global economic conditions and volatility of the market for our products; natural disasters and public health crises, such as the COVID-19 pandemic; our ability to expand our operations effectively; timely availability and customer acceptance of our new and existing solutions; risks and uncertainties relating to acquisitions or other investments; the impact of economic and political uncertainties and weaknesses in various regions of the world, including the commencement or escalation of hostilities or acts of terrorism; intense competition in the market for cyber security and application delivery solutions and in our industry in general and changes in the competitive landscape; changes in government regulation; outages, interruptions or delays in hosting services or our internal network system; compliance with open source and third-party licenses; the risk that our intangible assets or goodwill may become impaired; our dependence on independent distributors to sell our products; long sales cycles for our solutions; changes in foreign currency exchange rates; real or perceived shortcomings, defects or vulnerabilities in our solutions or if we or our end-users experience security breaches; the availability of components and manufacturing capacity; our reliance on a single managed security service provider to provide us with scrubbing center services; the ability of vendors to provide our hardware platforms and components for our main accessories; our ability to protect our proprietary technology; intellectual property infringement claims made by third parties; changes in tax laws; our ability to realize our investment objectives for our cash and liquid investments; our ability to attract, train and retain highly qualified personnel; and other factors and risks over which we may have little or no control. This list is intended to identify only certain of the principal factors that could cause actual results to differ. For a more detailed description of the risks and uncertainties affecting Radware, refer to Radware’s Annual Report on Form 20-F, filed with the Securities and Exchange Commission (SEC) and the other risk factors discussed from time to time by Radware in reports filed with, or furnished to, the SEC. Forward-looking statements speak only as of the date on which they are made and, except as required by applicable law, Radware undertakes no commitment to revise or update any forward-looking statement in order to reflect events or circumstances after the date any such statement is made. Radware’s public filings are available from the SEC’s website at www.sec.gov or may be obtained on Radware’s website at www.radware.com.
