Statement of verification

Radware Ltd
22 Raoul Wallenberg Street, Tel Aviv 6971917, Israel

07 August 2025

Scope

Radware Ltd (henceforth referred to as Radware) engaged Carbon Footprint Ltd to verify its carbon footprint assessment and supporting evidence for the period **1st January 2024 to 31st December 2024**. Radware is responsible for the information within the carbon footprint report. The responsibility of Carbon Footprint Ltd is to provide a conclusion as to whether the statements made are in accordance with the GHG Protocol Corporate Standard.

Methodology

The verification was led by Aaron Aaltonen, Senior Environmental Consultant, Carbon Footprint Ltd. Carbon Footprint Ltd completed the review in accordance with the [‘ISO 14064 Part 3 \(2019\): Greenhouse Gases: Specification with guidance for the verification and validation of greenhouse gas statements’](#). The work was undertaken to provide a Limited level of assurance with respect to the GHG statements made. Carbon Footprint Ltd believes that the review of the assessment and associated evidence, coupled with this subsequent report, provides a reasonable and fair basis for our conclusion.

The following data was within the scope of the verification (below shows the post-audit results):

		Location-based tCO₂e	Market-based tCO₂e
Scope 1:	Refrigerants	101	101
Scope 2:	Electricity consumption	2,823	893
Scope 3:	Transmission and Distribution, Well-To-Tank, Flights, Hire cars, Paper, Water supply and wastewater, Waste, Purchased Goods and Services, Use of sold products, End-of-life treatment of sold products, Outsourced Logistics - Sea, Outsourced Logistics - Air, Home-workers	31,251	31,251
Subtotal (Scopes 1,2 and 3)		34,175	32,245

Assurance opinion

Based on the results of our verification process, Carbon Footprint Ltd provides limited assurance of the GHG emissions statement, **and found no evidence that the GHG emissions statement:**

- is not materially correct and is not a fair representation of the GHG emissions data and information;
- has not been prepared in accordance with the GHG Protocol Corporate Standard.

It is our opinion that Radware has established appropriate systems for the collection, aggregation and analysis of quantitative data for determination of GHG emissions for the stated period and boundaries.
