

WORKSHOP

BACKGROUND

Let our experts review key design scenarios with your team and introduce technology advancements that will lead to an optimal solution designed specifically for your business. Get personalized attention and privately discuss your unique production environment. An on-site workshop is scheduled at a time that is convenient for your team, is delivered at your location and includes travel costs for the trainer.

WHAT'S INCLUDED?

Design and Architecture Review

Radware's consultant will provide a thorough review of your business goals and needs, an assessment of your network optimization and an analysis of your application architecture. The end target is to ensure your network environment is running with the best design that suits your current and future business goals.

Configuration Tuning and Optimization

Radware's consultant will review and analyze your running configuration in order to ensure it is optimized to run as efficiently as possible and plan for future changes in your business requirements.

Capacity Analysis and Planning

Radware's consultant will analyze the current traffic volume in your network combined with the forecasted growth and provide recommendations for the future.

Customized Training

Radware's consultant will provide training sessions tailored to your organizational needs and knowledge level.
