

Safe Harbor

This presentation includes "forward-looking statements" within the meaning of the Private Securities Litigation Reform Act of 1995. Any statements made herein that are not statements of historical fact, including statements about Radware's plans, outlook, beliefs or opinions, are forward-looking statements. Generally, forward-looking statements may be identified by words such as "believes," "expects," "anticipates," "intends," "estimates," "plans," and similar expressions or future or conditional verbs such as "will," "should," "would," "may" and "could." Because such statements deal with future events, they are subject to various risks and uncertainties, and actual results, expressed or implied by such forward-looking statements, could differ materially from Radware's current forecasts and estimates. Factors that could cause or contribute to such differences include, but are not limited to: the impact of global economic conditions and volatility of the market for our products; the effects of the current attacks by the terrorist groups Hamas and Hezbollah, and the war between Israel and Hamas and Israel and Hezbollah; natural disasters and public health crises, such as the COVID-19 pandemic; A shortage of components or manufacturing capacity could cause a delay in our ability to fulfill orders or increase our manufacturing costs; Our business may be affected by sanctions, export controls and similar measures targeting Russia and other countries and territories as well as other responses to Russia's military conflict in Ukraine, including indefinite suspension of operations in Russia and dealings with Russian entities by many multi-national businesses across a variety of industries; our ability to expand our operations effectively; timely availability and customer acceptance of our new and existing solutions; risks and uncertainties relating to acquisitions or other investments; the impact of economic and political uncertainties and weaknesses in various regions of the world, including the commencement or escalation of hostilities or acts of terrorism; intense competition in the market for cyber security and application delivery solutions and in our industry in general and changes in the competitive landscape; changes in government regulation; outages, interruptions or delays in hosting services or our internal network system; compliance with open source and third-party licenses; the risk that our intangible assets or goodwill may become impaired; our dependence on independent distributors to sell our products; long sales cycles for our solutions; changes in foreign currency exchange rates; real or perceived shortcomings, defects or vulnerabilities in our solutions or if we or our end-users experience security breaches; the availability of components and manufacturing capacity; our reliance on a single managed security service provider to provide us with scrubbing center services; the ability of vendors to provide our hardware platforms and components for our main accessories; our ability to protect our proprietary technology; intellectual property infringement claims made by third parties; changes in tax laws; our ability to realize our investment objectives for our cash and liquid investments; our ability to attract, train and retain highly qualified personnel; and other factors and risks over which we may have little or no control. This list is intended to identify only certain of the principal factors that could cause actual results to differ. For a more detailed description of the risks and uncertainties affecting Radware, refer to Radware's Annual Report on Form 20-F, filed with the Securities and Exchange Commission (SEC) and the other risk factors discussed from time to time by Radware in reports filed with, or furnished to, the SEC. Forward-looking statements speak only as of the date on which they are made and, except as required by applicable law, Radware undertakes no commitment to revise or update any forward-looking statement in order to reflect events or circumstances after the date any such statement is made. Radware's public filings are available from the SEC's website at www.sec.gov or may be obtained on Radware's website at www.radware.com.

KillNet hits healthcare sector with DDoS attacks

Posted: February 10, 2023 by Pieter Arntz

At the end of January, the Health Sector Cybersecurity Coordination Center warned that the KillNet group is actively targeting the US healthcare sector with distributed denial-of-service (DDoS) attacks.

The Cybersecurity and Infrastructure Security Agency (CISA) says it helped dozens of hospitals

Radware Strategy Summary

- 2 Critical Areas
 Large, strong and profitable
- Accelerating Cloud Security Business
 Strong growth, expanding SAM, SaaS business model
- Leverage in the Model
 Driving profitable growth with OpEx leverage

Environment, Social, Governance

Establishing a Clean, Ethical and Human Future

Protecting the Environment

- Implemented KPIs for reduction in the use of water, power and paper
- Providing energy saving products to our customers
- Setting environmental policy goals in measuring impact, consideration in operation and informing proper use of our products

Promoting Human Rights

- Published Human Rights and Labor Standard Policy
- Radware was named in the Top 100 Workplaces for Diverse Representation by Mogul
- Encourage a culture of open dialogue and support and attend to our employees' wellbeing

Investing in Community

- Building strong relationship with the community with various projects
- Empowering next-cyber generation with interns and mentoring high school students
- Empowering women through education or supporting business
- Promoting inclusion of underrepresented communities
