

Course Code: VIS-100

**APolute Vision™ / APM for
Radware-certified Professionals
Course Outline**

Version 1.1

1 Scope

Welcome to Course #VIS-100: APSolute Vision™ / APM for Radware-certified Professionals.

This course is designed for Radware-certified professionals that want more in-depth, hands-on experience on the Vision platform.

APSolute Vision™ offers a centralized, web-based attack management, monitoring and reporting solution across multiple DefensePro devices and locations. This online, non-certification, self-paced tutorial illustrates how APM and Vision Reporter provide real-time identification, prioritization, and response to policy breaches, cyberattacks, and insider threats.

Supported by hands-on lab exercises, this training covers Vision management and administration as well as Application Performance Monitoring and reporting.

Level 1 technical certification on any Radware solution is a prerequisite for this course.

2 Course Details

The APSolute Vision™ / APM for Radware-certified Professionals online training can be completed in about 4 hours and features an additional 4-hour, hands-on lab component, scheduled separately.

The following topics are covered in this course:

APSolute Vision™ Overview
