

MTBF Declaration

Dear customer,

Radware's products based on HW Model **ODS-VL**, in Ambient Temperature **25°C** have MTBF (Mean Time Between Failures) as follow:

- Security Products - minimum **63,842 hrs.**
- ADC Products - minimum **76,757 hrs.**

MTBF calculation is based on:

- The simulation of key components to have the estimated value
- Calculation formula:

$$\lambda = \sum_{i=1}^n \lambda_i \quad MTBF = \frac{1}{\lambda}$$

Where: λ_i = failure rate of the item
n = number of items.
