

Environmental Policy

October, 2017

This document was approved by Radware's Board of Directors and executive management and is publicly available on our website. All employees are informed about the contents of this document.

Environmental Policy

1. Our Environmental Policy

Radware Ltd., a global leader of solutions for virtual and cloud data centers, believes it has a responsibility to care for and protect the environment in which it operates. In accordance with this policy, Radware complies with all environmental laws.

Radware strives to and manages all phases of its business in a manner that minimizes the impact of its operations on the environment, including, among others, implementing reduced packaging material procedures, reducing energy consumption in our facilities, installing smart in-row cooling system and offering downloadable software and documentation to our customers.

Radware established an Integrated Management System (IMS) that provides a framework for Quality, Environment and Health & Safety objectives. Radware complies with ISO 14001 and works to integrate the IMS framework throughout our operations

Radware aims to reduce its environmental impact throughout its value chain. Our products' manufacturers are certified for the ISO 14001 standard and when a new supplier is required, a preference for suppliers that are ISO 14001 certified is part of the selection.

We also recognize that we have a responsibility to the environment beyond legal and regulatory requirements. We are committed to improving our environmental performance and will encourage our customers and suppliers to join us in this effort.

We aspire to help our customers protect the environment by developing sustainable, energy saving products. We aim to design products that will be innovative, safe for use, environmentally friendly and re-usable, recyclable and safely disposed of. For example, most of our products platforms are 80 Plus certified, in order to provide our clients the highest energy efficiency

We are committed to:

- Measure our environmental impact.
- Make an effort to integrate environmental considerations into products' development, manufacturing processes, transportation and service impacts.
- Inform our customers about proper and environmental-safe usage and maintenance of our products.

We will strive to:

- Assess our organizational activities and identify areas where we can improve our impact.
- Exceed all relevant regulatory requirements.
- Conduct our business in a sustainable manner and minimize our energy consumption and encourage our suppliers to do the same.
- Continually improve our environmental impacts.
- Incorporate environmental factors into business decisions.
- Increase employee awareness and training.
