**John Buckley, Managing Director,
Carbon Footprint Ltd**

Statement of verification

Radware Ltd
22 Raoul Wallenberg Street
Tel Aviv 69719

24 July 2023

Scope

Radware Ltd (henceforth referred to as Radware) engaged Carbon Footprint Ltd to verify its carbon footprint assessment and supporting evidence for the period **1st January 2022 to 31st December 2022**. Radware is responsible for the information within the carbon footprint report. The responsibility of Carbon Footprint Ltd is to provide a conclusion as to whether the statements made are in accordance with the GHG Protocol Corporate Standard.

Methodology

The verification was led by Shnelle Owusu-Mfum, Environmental Consultant, Carbon Footprint Ltd. Carbon Footprint Ltd completed the review in accordance with the [‘ISO 14064 Part 3 \(2019\): Greenhouse Gases: Specification with guidance for the verification and validation of greenhouse gas statements’](#). The work was undertaken to provide a limited level of assurance with respect to the GHG statements made. Carbon Footprint Ltd believes that the review of the assessment and associated evidence, coupled with this subsequent report, provides a reasonable and fair basis for our conclusion.

The following data was within the scope of the verification (below shows the post-audit results):

Scope 1: Refrigerants	109.92 tCO₂e
Scope 2: Electricity consumption	1,754.89 tCO₂e (location-based) 2,311.14 tCO₂e (market-based)
Scope 3: Cat. 1. Purchased goods and services (purchased water & paper), Cat. 3. Fuel- and energy related activities (not included in scope 1 or scope 2), Cat. 5. Waste generated in operation, Cat. 6. Business travel (not included in scope 1 or scope 2), Cat. 7. Employee commuting (home working), and Cat. 10 Processing of sold products.	973.37 tCO₂e
Location-Based Total	2,838.18 tCO₂e
Market-Based Total	3,394.43 tCO₂e

Assurance opinion

Based on the results of our verification process, Carbon Footprint Ltd provides limited assurance of the GHG emissions statement, **and found no evidence that the GHG emissions statement:**

- is not materially correct and is not a fair representation of the GHG emissions data and information;
- has not been prepared in accordance with the GHG Protocol Corporate Standard.

It is our opinion that Radware has established appropriate systems for the collection, aggregation and analysis of quantitative data for determination of GHG emissions for the stated period and boundaries.
