Use of Non-GAAP Financial Information and Key Performance Indicators

In addition to reporting financial results in accordance with generally accepted accounting principles (GAAP), Radware uses non-GAAP measures of gross profit, research and development expense, selling and marketing expense, general and administrative expense, total operating expenses, operating income, financial income, net, income before taxes on income, taxes on income, net income and diluted earnings per share, which are adjustments from results based on GAAP to exclude, as applicable, stock-based compensation expenses, amortization of intangible assets, litigation costs, acquisition costs, exchange rate differences, net on balance sheet items included in financial income, net, and tax-related adjustments. Management believes that exclusion of these charges allows for meaningful comparisons of operating results across past, present, and future periods. Radware's management believes the non-GAAP financial measures provided in this release are useful to investors for the purpose of understanding and assessing Radware's ongoing operations. The presentation of these non-GAAP financial measures is not intended to be considered in isolation or as a substitute for results prepared in accordance with GAAP. A reconciliation of each non-GAAP financial measure to the most directly comparable GAAP financial measure is included with the financial information contained in this press release. Management uses both GAAP and non-GAAP financial measures in evaluating and operating the business and, as such, has determined that it is important to provide this information to investors.

Annual recurring revenue ("ARR") is a key performance indicator defined as the annualized value of booked orders for term-based cloud services, subscription licenses, and maintenance contracts that are in effect at the end of a reporting period. ARR should be viewed independently of revenue and deferred revenue and is not intended to be combined with or to replace either of those items. ARR is not a forecast of future revenue, which can be impacted by contract start and end dates and renewal rates and does not include revenue reported as perpetual license or professional services revenue in our consolidated statement of operations. We consider ARR a key performance indicator of the value of the recurring components of our business.
