

About the Professional Services Group

Radware's Professional Services Group is staffed by a global team of experts possessing extensive knowledge and experience in network and application security, threat detection and mitigation. The group offers a full range of services to design, implement and optimize networks by leveraging their unparalleled knowledge of Radware's state-of-the-art Attack Mitigation Solution (AMS) suite. Working as an independent resource or together with customer teams, Radware's Professional Services Group helps protect against the latest threats with real-time monitoring of underground attackers to enable immediate delivery of ongoing signature updates for the latest attack vectors.

PERIODICAL SECURITY ASSESSMENT

Frequent assessments and maintenance are the key to keeping networks and applications secure from today's threats. The Professional Services Group's annual security assessment is Radware's premiere offering to ensure that your Radware products maintain proper integration within a customer's overall security architecture and are optimally tuned to defend against the latest threats.

Through Radware's annual assessment, Professional Services Group experts design a custom review for each network environment and its unique security needs, including updated recommendations on the provisioning, configuration and tuning of Radware products, as well as refinements to the customer's overall network and applications and alignment of its network with proven best practices leveraging the latest intelligence. The result is demonstrably better protection of the customer's digital assets from today's threat landscape.

KEY PACKAGE ACTIVITIES

Environment Review

The Professional Services Group's experts gather existing solution information for analysis and recommendation:

- ▶ Analysis of security requirements: networks, services and layers of protection
- ▶ Review of data flows in relation to the deployed security solution
- ▶ Review and analysis of DefensePro
 - Network and geographic location
 - Software and firmware versions

Solution Review

The Radware Professional Services Group's solution review leverages a comprehensive investigation and objective assessment of the network and its assets. It begins with a thorough review of business goals, a risk analysis and a network assessment in order to create a comprehensive, updated security plan tailored to the organization's specific requirements and backed by Radware's latest threat intelligence. The review provides both general and custom research specifically in consideration of the business. This results in a set of documentation which is actionable at both the strategic and tactical levels, helping the organization stay proactive in dealing with the always evolving threat landscape.

Professional Services Group experts will:

- ▶ Analyze application deployment and custom scripts
- ▶ Review configuration for optimization
- ▶ Review design and security plans
- ▶ Review web performance for optimization
- ▶ Review application performance
- ▶ Complete signature review

Findings and Recommendations

The Professional Services Group will provide a detailed Executive Summary Report, which will include:

- ▶ A detailed description of the work performed by the Professional Services Group
- ▶ Conclusions and recommendations for existing configuration modifications and monitoring
- ▶ Best practice recommendations regarding relevant software upgrades
- ▶ New feature implementations to meet evolving organization needs

KEY BENEFITS

Maximize Application Performance

- ▶ Utilize expert talent and leading services to efficiently streamline advanced, complex and emerging solution deployments
- ▶ Access Radware intelligence assets to increase technical knowledge and avoid gaps and risks in managing long-term deployments

Accelerate Deployment Timelines

- ▶ Reduce financial negotiations and budget approvals for new expenditures related to application infrastructure

Peace of Mind

- ▶ By purchasing Radware professional services hours in advance, organizations can use them on demand to maximize their investments
